Risks

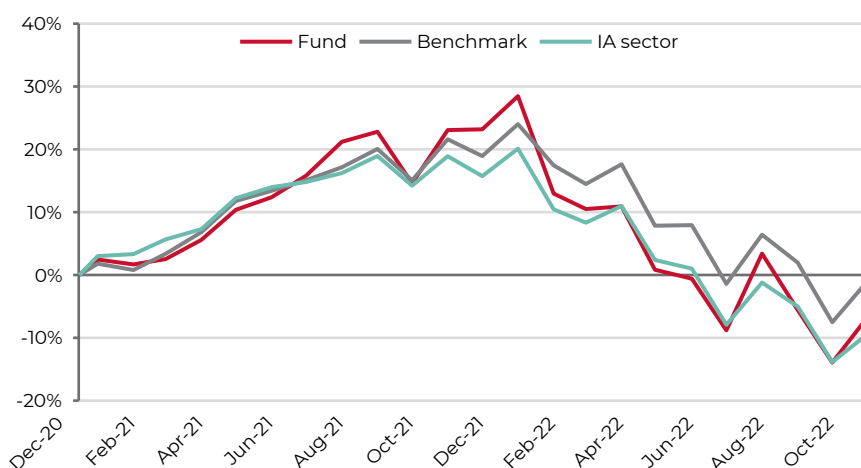

Guinness Sustainable Global Equity Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on our website.

Source: FE fundinfo to 31.10.22. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 1.99%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Graph data is in USD.

Fund Profile

Aim

Long-term capital appreciation

Investment Case

Global exposure to high quality growth companies, with sustainable products and practices. Focus on mid-cap opportunities created by the transition to a more sustainable economy.

Process

The Fund focuses on profitable companies with a long history of persistently high return on capital and balance sheet strength. We exclude companies which produce harmful products, and which have poor ESG practises, whilst seeking companies aligned to our sustainability themes, and which score well on our ESG assessment. We look for companies that can grow profitably without the need for significant external capital, and we aim to avoid over-paying for future growth.

Portfolio

Concentrated, equally-weighted portfolio of 30 stocks, which reduces stock-specific risk and instils a strong sell discipline. Low turnover; minimum \$500m market cap; no benchmark-driven constraints on sector and regional weightings.

Investment Objective

An equity fund investing in global companies that are aligned with the transition to a more sustainable economy.

The Fund is actively managed and uses the MSCI World Index as a comparator benchmark only.

Lower RiskHigher Risk

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The fund has been classed as 6 because its volatility has been measured as above average to high.
