## Risks

Guinness Sustainable Global Equity Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on our website.

## Performance Notes

Source: FE fundinfo to 30.04.22. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 0.89%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Graph data is in USD.

## Fund Profile

### Aim

Long-term capital appreciation

### Investment Case

Global exposure to high quality growth companies, with sustainable products and practices. Focus on mid-cap opportunities created by the transition to a more sustainable economy.

### Process

The Fund focuses on profitable companies with a long history of persistently high return on capital and balance sheet strength. We exclude companies which produce harmful products, and which have poor ESG practises, whilst seeking companies aligned to our sustainability themes, and which score well on our ESG assessment. We look for companies that can grow profitably without the need for significant external capital, and we aim to avoid over-paying for future growth.

### Portfolio

Concentrated, equally-weighted portfolio of 30 stocks, which reduces stock-specific risk and instils a strong sell discipline. Low turnover; minimum \$500m market cap; no benchmark-driven constraints on sector and regional weightings.

### Investment Policy

An equity fund investing in global companies that are aligned with the transition to a more sustainable economy.

The Fund is actively managed and uses the MSCI World Index as a comparator benchmark only.

Lower Risk .....Higher Risk

### Risk & Reward

The risk and reward indicator shows where the fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table shows this fund's rank. The fund is ranked as higher risk as its price has shown high fluctuations historically. This is based on how investments have performed in the past and you should note that the fund may perform differently in the future and its rank may change. Historical data may not be a reliable indicator for the future.
