Risks

The Fund is a multi-asset fund investing primarily in other funds ("Underlying Funds") which may invest in equities, Government Bonds, fixed interest securities (which may include sub-investment grade securities), property and other investments. Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement, and you may not get back the amount originally invested. Further details on the risk factors are included in the Fund's documentation, available on our website.

Cumulative Performance

FE fundinfo 30.04.24. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The OCF for the share class used for the fund performance returns is 2.00%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return.

Market Commentary

Bonds and equities struggled in May as markets, once again, came to terms with further delays to US interest rate cuts. Higher than expected CPI, driven by labour costs and increased personal expenditure helped push CPI to 3.5% annually. Markets, which at the end of 2023 anticipated 6 cuts this year, have readjusted to 1 to 2 cuts starting at some point in H2. As a result, most developed equity markets and bond markets fell over the month. Unsurprisingly, growth and small cap stocks fell more than value stocks. This was despite most US companies beating expectations with their Q1 results

However, Emerging Markets, Asia and the UK were able to produce positive returns in US dollars. The former two were assisted by the recovery in Chinese stockmarkets as investors started to see value in the market despite continuing concerns around the strength of the recovery, the property crisis and youth unemployment.

The UK market benefitted from the indices' bias towards value, energy and mining stocks. Concerns about an escalation in events in the Middle East saw a rise in energy prices. All this helped to push the FTSE 100 to all-time highs.

Markets are now anticipating that both the Bank of England and ECB will cut rates before the US with 8 June the favoured date for the first cut by the ECB.

Over the month the quality and value tilt of the SPDR Aristocrats fund, and the exposure to China via the Xtrackers CSI300 fund were the highlights.

Fund Profile

Investment Objective

The investment objective is to provide capital appreciation over the long term. Returns will be generated through both capital growth and income, with a bias towards developed and liquid capital markets. The risk will be diversified by holding collective investments in a range of asset classes and geographies. The management of the portfolio aims to meet the objective conservatively by taking managed risk through fund selection and asset allocation. The portfolio is based on the Brewin Dolphin International MPS Passive Plus Balanced Strategy.

Investment Policy

The Fund is actively managed without reference to a benchmark. The Fund invests in funds in a range of different asset classes.
