Risks

Guinness Best of China Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund only invests in the Greater China region; it is therefore susceptible to the performance of that region, and can be volatile. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on our website.

Performance Notes

Source: FE fundinfo to 30.04.22. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 0.89%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Graph data is in USD.

Fund Profile

Aim

Long-term capital growth

Investment Case

Gives exposure to economic expansion and demographic trends in China and Taiwan. We believe that over the next twenty years China will experience rising incomes, the spread of wealth and the continuing expansion of its consumer market. This economic transition should lead to more sustainable growth than the industrial and infrastructure-led growth that China has already experienced.

Process

Value bias in bottom-up stock selection. Focus on profitable companies generating persistently high return on capital over the business cycle. Stringent due diligence process to avoid companies that are over-hyped or at risk of management or corporate failure.

Portfolio

Invests in stocks listed in the Greater China region (China, Hong Kong and Taiwan) or elsewhere that do at least half of their business in the region. Concentrated equally-weighted portfolio of 33 stocks. Majority of Fund invested in stocks over \$200m in size.

Investment Policy

An equity fund investing primarily in companies that are listed in Greater China or derive at least 50% of their revenues from business activities in the region.

The Fund is actively managed and uses the MSCI Golden Dragon Index as a comparator benchmark only.

Lower RiskHigher Risk

The risk and reward indicator shows where the fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table shows this fund's rank. The fund is ranked as higher risk as its price has shown high fluctuations historically. This is based on how investments have performed in the past and you should note that the fund may perform differently in the future and its rank may change. Historical data may not be a reliable indicator for the future.
