Risks

Guinness Global Money Managers Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund invests only in companies involved in asset management and other related industries; it is therefore susceptible to the performance of that one sector, and can be volatile. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on our website.

Performance Notes

Source FE fundinfo to 30.04.22. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 0.74%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Graph data is in USD.

Fund Profile

Aim

Long-term capital growth

Investment Case

Provides global exposure to the growth potential of asset managers. Successful asset managers can grow very rapidly, particularly in rising markets. Their risk-return characteristics are especially attractive, since they tend to require relatively little capital to grow. Asset management is also a growing global sector: assets under management are rising faster than underlying equity markets.

Process

50% top down, 50% bottom up. Value bias in bottom-up stock selection

Portfolio

Equities of companies in asset management, wealth management, stock exchanges and custodian and trustee services. Concentrated equally-weighted portfolio of 30 positions. Majority of Fund invested in stocks over \$500m in size.

Investment Policy

An equity fund that invests primarily in globally based companies principally engaged in the provision of asset management services.

The Fund is actively managed and uses the MSCI World Index as a comparator benchmark only.

Typically Lower Rewards					Typically Higher Rewards	

The risk and reward indicator shows where the fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table shows this fund's rank. The fund is ranked as higher risk as its price has shown high fluctuations historically. This is based on how investments have performed in the past and you should note that the fund may perform differently in the future and its rank may change. Historical data may not be a reliable indicator for the future.
